EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony R. Lambert on November 22, 2005.

The application has been amended as follows: cancel claims 1-2, 4-9, and 21-25.

The following is an examiner's statement of reasons for allowance: during a preliminary appeals conference it was agreed that that the independently claimed liquid drop freeze treatment and deposition with dry powder formation concurrent coolant flow or the independently claimed injection system providing a flow of coolant entraining liquid droplets sprayed by an atomizer is not completely anticipated by the prior art used in the rejection. It was also agreed that the prior art of record does not contain the necessary motivation or combination suggestion to obviate the claimed invention. It was also agreed that the first independently claimed method (claim 1 and its dependent claims) could be broadly construed under current Office practice such that the rejections are proper for appeal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
